BERGMANN

The ultimate articulated dump truck.
Bergmann ADT150.

Made in Germany.

BERGMANN

Bigger. Faster.

Bergmann ADT150.
Move more for less.

Superlative technology, impressively delivered. Safe, comfortable, long-lasting.

The Bergmann ADT150 combines safety and ride comfort at the very highest level. It demonstrates that safety, efficiency, off-road capability and driving comfort all go together perfectly. As well as the very highest standards of operational safety, the ADT150 design makes industrial health and safety a top priority.

One of a kind

The rotatable driver's console is unique in the 12-tonne class. With top visibility, it offers a forward speed of 40 km/h and a reverse speed of 30 km/h, making it a top-performing transporter.

Steadfastly reliable for over 10 years:

- Drain and road building
- Underground and tunnel construction
- Energy supply (track construction)
- Gardening and landscaping
- Land improvement
- Pipeline laying
- Quarrying
- Sports ground construction

Cabin with swivel seat and intuitive operability.

Good access to all maintenance points with the patented hood system.

Articulated swivel joint with stabilisation cylinder.

The result of our longstanding experience, innovation and quality.

Employee-friendly

Comfortable cabin with swivelling operator's position and well-designed joystick, allowing all functions to be operated with one hand. This ensures increased safety and comfort, not to mention greater comfort in the workplace.

Safe and easy to maintain

The central electrics and climate control technology is positioned in such a way that it can be accessed at any time.

Economical and climate-friendly

Powerful Cummins engine for fuel-efficient, low-emission use in line with current emission regulations.

Quick working

Suspended front axle for comfortable working even at high speeds (40 km/h forwards and 30 km/h backwards).

Optimal servicing times

Thanks to good accessibility and the patented hood system. All filters can be reached from the ground via the wide-opening bonnet.

Economical transport of materials

Depending on the place of use and material, you can choose between rear, three-way or swivel-tip buckets.

Soil-conserving

Optimum ground pressure is ensured at all times by a wide range of tyres for different types of terrain.

Well protected

The articulated pendulum joint with stabilisation cylinder ensures optimum traction and high stability over the ground. It also provides greater safety while working.

Bigger. Faster. Better.

You know
this one, right?

Conventional compact tipper

You should
know that one!

Bergmann ADT150

- + 20 % payload
- + 43 % load volume
- + 31 % efficiency*
- + 50 % effectiveness*

* Results of a field test in autumn 2017.
Efficiency = transported material in m³ per litre of fuel.
Effectiveness = transported material in m³ for operating time.

Saves time and money.
Because it simply performs better.
Bergmann ADT150. **Try it now!**

Technical specifications Bergmann ADT150 R with swivel-tip bucket

Payload	12,000 kg
Capacity heaped	8.0 m³
Total length	7,129 mm
Total width	2,500 mm
Clearance height without rotating light	3,022 mm
Ground clearance	429 mm
Dumping height	1,344 mm
Load height	2,408 mm
Engine power	119 kW
Dead weight	11,140 kg
